

DMG MORI

AKTIENGESELLSCHAFT

Dynamic and precise: A DMG MORI employee adjusts the hydraulic settings of the NHX 4000 horizontal machining centre. The high-tech machine is produced by DECKEL MAHO in Pfronten and is used in the automotive industry amongst others.

DMG MORI

AKTIENGESELLSCHAFT

State-of-the-art technology from Seebach: In the final assembly hall the DMG MORI high-tech machines are set to the customer specifications and checked against all quality standards before shipping.

DMG MORI

AKTIENGESELLSCHAFT

Attractive employer: Apprentices at SAUER start learning early on the most up-to-date systems and own machines. Rainer Schwab, applications engineer at SAUER (2nd from left), explains how to programme the ULTRASONIC 20 linear high-tech machine to the apprentices, Frederik Brusius (left), Moritz Scherer (2nd from right) and Jan Runkowski, via the innovative APP-based control and operating software CELOS.
