Ground-breaking solutions for industry and consumers.

Energy Solutions from gildemeister.

Creating the future. Forming real value.

Generating cleaner electricity economically and making it available for innovative applications: with the SunCarrier and the long-lasting and low-maintenance CellCube big battery, gildemeister offers ground-breaking solutions. These allow our customers to implement integrated systems in the future market of renewable energies today – like the e-fuelling station, for example.

Creating the future. Forming real value.

With technologies from GILDEMEISTER: We start 2012 from a position of strength. Our machines will continue to move the world for they lie at the start of the worldwide process chains. Our high innovative capacity and a growing international sales and service network ensure that more than 140,000 installed machines are in use throughout the world. The future is shaped by them, as new, real products are developed on them daily. Our range covers the “Machine Tools” segment with its core expertise of turning and milling, as well as ultrasonics/lașertec and electronics. “Industrial Services” offers automation and software solutions plus services for machine tools, while Energy Solutions offers intelligent energy concepts for a sustainable world. Technological knowhow and a global innovative capacity reinforce our position on the markets relevant for us. Through this we create real value for our customers.

On the following pages we would like to give you an insight into the world of GILDEMEISTER.

There are areas of life where it’s not just a matter of millimetres but of micro millimetres and for good reason. Such as in medicine. Whether an endoprosthesis for knee and hip joints, joint sockets, bone screws or medical implants made of high-tech ceramics – thanks to highly efficient production solutions, gildemeister is the pacesetter on the way to the future.

Stability. Turning technology from GILDEMEISTER.

Special challenges lend us wings. Could there be any higher challenges than those of the aerospace industry? Keeping an overview, seeing the whole picture and above all thinking ahead of the rest – only in this way will safe, economic solutions form tomorrow's world. Solutions, like the ones that we develop year after year for the aerospace industry.

Seriously better high-tech solutions.
Milling technology from GILDEMEISTER.

User-friendly technology, trendsetting product strategies and industry-focused solutions - that’s GILDEMEISTER worldwide for milling technology at the highest level. With a wide range of products we offer our customers high-tech solutions in every field of application. From our universal milling up to five-axis machining combined with turning technology.

CNC UNIVERSAL MACHINES: DMU
- Cnc-Universal milling machines for
  - cnc-Universal milling machines
  - 4-axis + 5-axis milling
  - 4-axis + 5-axis milling

Globalisation.

ECOLINE technology from GILDEMEISTER.

Anywhere in the world where industry is picking up speed, is where we are. As in Russia, in Ulyanovsk, an industrial centre on the Volga, where companies from the automotive and aerospace sectors are established. GILDEMEISTER is investing here in a state-of-the-art assembly plant, which will produce ECOLINE machines in the future.

Solutions for entry level of the highest quality.

ECOLINE technology from GILDEMEISTER.

Top quality with the most up-to-date 3D control technology and impressive performance. With the ECOLINE we make it possible for our customers to gain optimum access to turning and milling operations at attractive entry level prices. The sound construction style and well-engineered components ensure reliable, high productivity for all world markets.
