

1,000 students look into the world of machine tools at the "future day"

DMG MORI pushes forward automation and digitization

Bielefeld/Pfronten. Strong performance: At the beginning of the year, DMG MORI presents its entire technological expertise on 7,500 m². With 70 high-tech machines, two world premieres as well as the future topics of automation, digitization and ADDITIVE MANUFACTURING, the traditional Open House exhibition at DECKEL MAHO in Pfronten (22-26 Jan. 2019) will be dedicated to integrated manufacturing solutions for holistic processes.

The more than 8,000 international trade visitors will be able to see 70 high-tech machines, including 20 with automation and two world premieres: the vertical high-speed machining center DMP 70 for series production and the LASERTEC 125 Shape for 3D laser texturing of freeform surfaces in workpieces up to 2,600 kg.

"Networked production, integrated automation and digitization concepts as well as high-precision and productive machines – we make our customers fit for the factory of the future", says Christian Thönes, Chairman of the Executive Board of DMG MORI AKTIENGESELLSCHAFT. With holistic solutions for automation, digitization and ADDITIVE MANUFACTURING, DMG MORI focuses on the entire value-added chain: "Integrated Digitization" accelerates end-to-end digitization – from production planning to digital production monitoring to networked services. The production facilities FAMOT in Pleszew and DECKEL MAHO in Seebach will be connected via live stream to the in-house exhibition Pfronten as digital factories of the future.

Further highlights: the large-scale machining in the XXL Center live with the DMU 600 P, the Aerospace and Die & Mold solutions with our experience of over 50 years and the newly launched certificates program of DMG MORI Qualified Products, which offers a diverse selection of high performance tooling systems on exclusive terms.

In the run-up to the Open House exhibition, DMG MORI is once again organizing a "future day": 1,000 pupils from the region inform themselves about modern training in an international high-tech company. The business magazines "Capital" and "Focus Money" recently awarded DMG MORI the title of "Germany's Best Instructor". The Pfronten site currently employs 1,597 people, including 123 apprentices.

Company Profile // DMG MORI

DMG MORI AKTIENGESELLSCHAFT is a worldwide leading manufacturer of machine tools with sales revenues of more than € 2.3 billion and more than 7,000 employees. As “Global One Company” – together with DMG MORI COMPANY LIMITED – we reach sales revenues of more than € 3.3 billion.

The range of products includes turning and milling machines as well as Advanced Technologies, such as ULTRASONIC, LASERTEC and ADDITIVE MANUFACTURING, plus automation and integrated technology solutions. Our technology excellence is bundled within the main sectors of “Aerospace”, “Automotive”, “Die & Mold”, and “Medical”. With our APP-based control and operating environment CELOS as well as exclusive Technology Cycles and Powertools, we are actively shaping Industrie 4.0. Already more than 10,000 DMG MORI machines fitted with CELOS have been supplied. With the open, digital platform ADAMOS as well as ISTOS and WERKBLIQ DMG MORI is offering its customers and suppliers an integrated digitization strategy.

Our customer-focused services covering the entire life cycle of a machine tool include training, repair, maintenance and a replacement parts service. Our partner program “DMG MORI Qualified Products” (DMQP) allows us to offer perfectly matched peripheral products from one source. More than 12,000 employees are working in the “Global One Company”. DMG MORI is present worldwide at 157 sales and service locations – thereof 14 production plants – and supplies customers from 42 different industries in 79 countries.
