

DMG MORI Energy and Environmental Policy

Sustainability has top priority for DMG MORI AKTIENGESELLSCHAFT. Therefore, we, DMG MORI AKTIENGESELLSCHAFT, commit ourselves to a responsible use of resources such as water and materials in particular, a long-term reduction of our energy consumption, a reduction of environmental impacts from chemicals and waste as well as a continuous improvement of energy and environment-related performance. In this way, we also contribute to the preservation of biodiversity and high air quality. Our energy management system according to DIN EN ISO 50001 and our environmental management system according to DIN EN ISO 14001 help us to achieve these goals. We take care that all requirements of these standards are implemented correctly and that the underlying processes are continuously improved.

We regularly check that

- necessary financial and structural conditions are ensured.
- all employees are integrated into our energy and environmental management system.
- responsibilities are clearly defined: (a) local energy managers and environmental managers at our sites and (b) a central energy and environmental manager.
- relevant legal obligations are taken into account.
- environmental impacts of our sites (e.g., local pollution) are avoided or minimized.
- environmental impacts of our products (e.g., in the use phase or during recycling) are avoided or minimized.
- regular evaluation takes place with regard to energy and environmental performance.
- performance-enhancing measures are implemented.
- resource-conserving, energy-efficient and emission-reduced products and services are purchased - we implement this in our partner and supplier management.
- health and safety of our suppliers, customers and partners are guaranteed.
- sustainable consumption is promoted.
- our management systems and our target achievement are reviewed by a regular, independent audit.

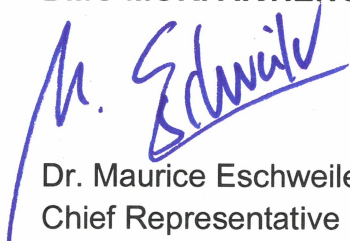

DMG MORI

AKTIENGESELLSCHAFT

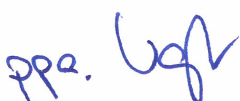

Our Sustainability Report summarizes our goals and activities in the areas of energy efficiency and resource management. It is available to all interested parties on our website: <https://de.dmgmori-ag.com/>
